Managed Services Unlock the Door to Improved Employee Experience

Compucom.

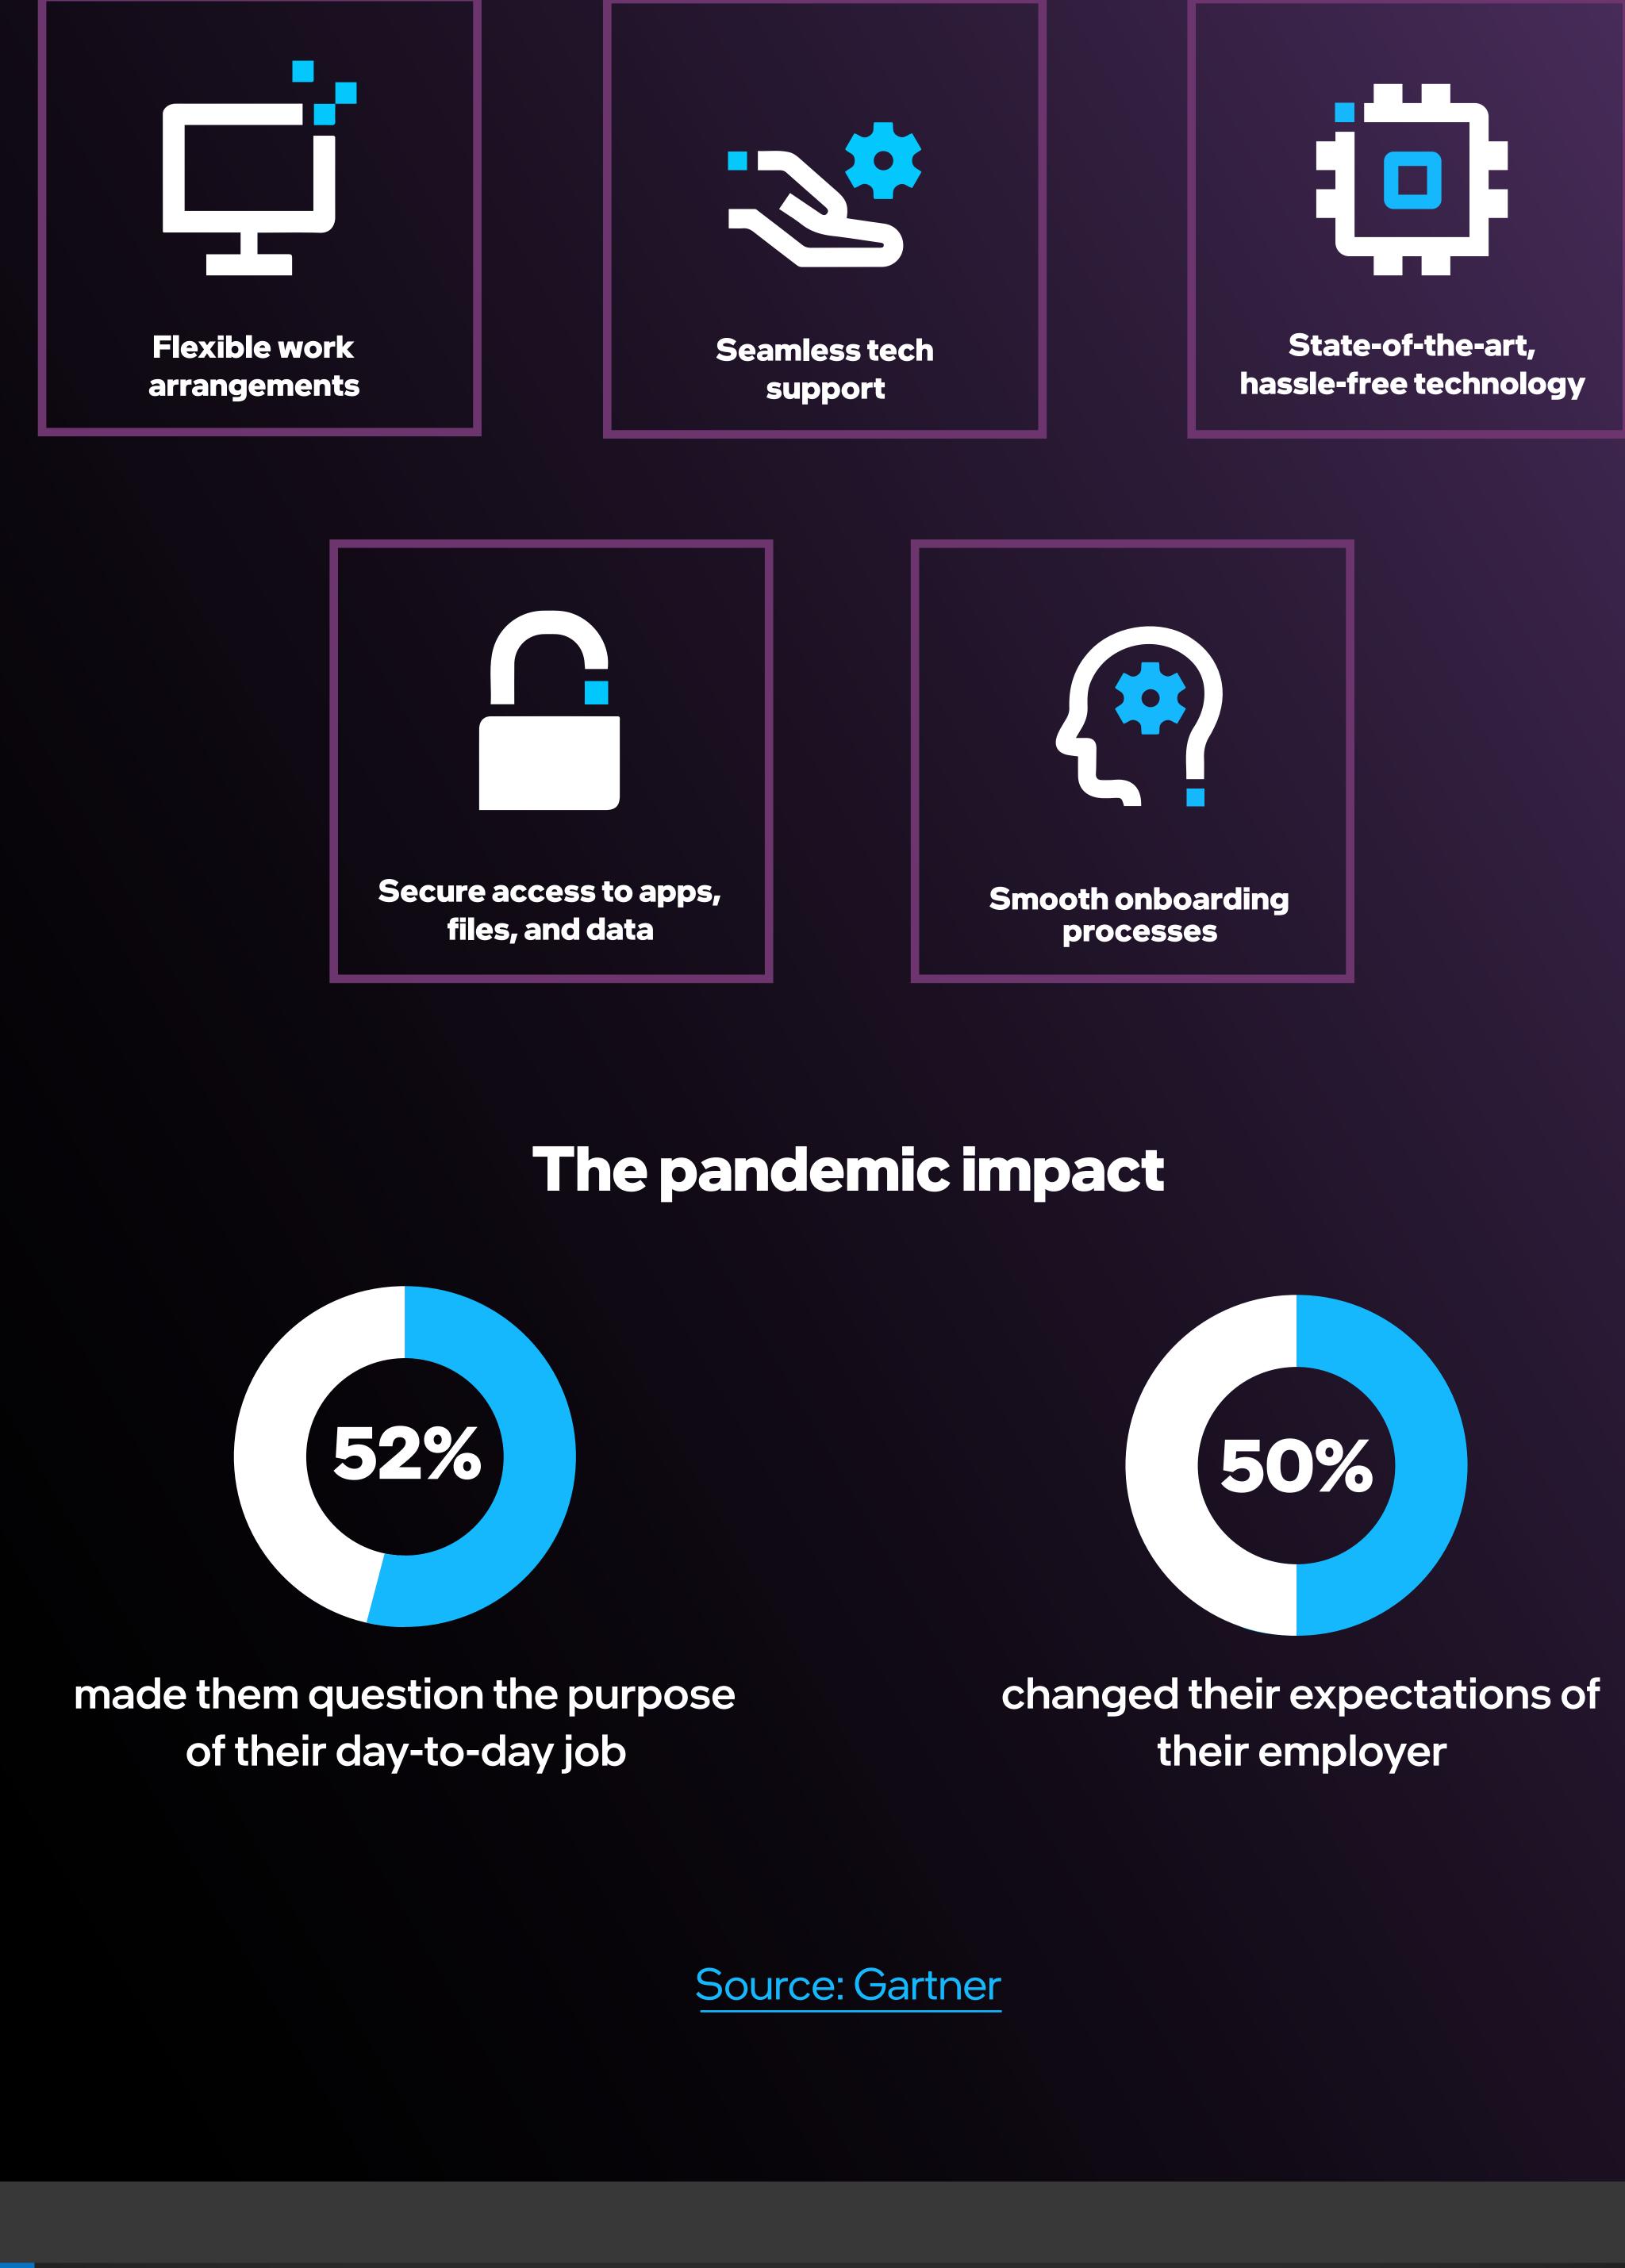

Inte

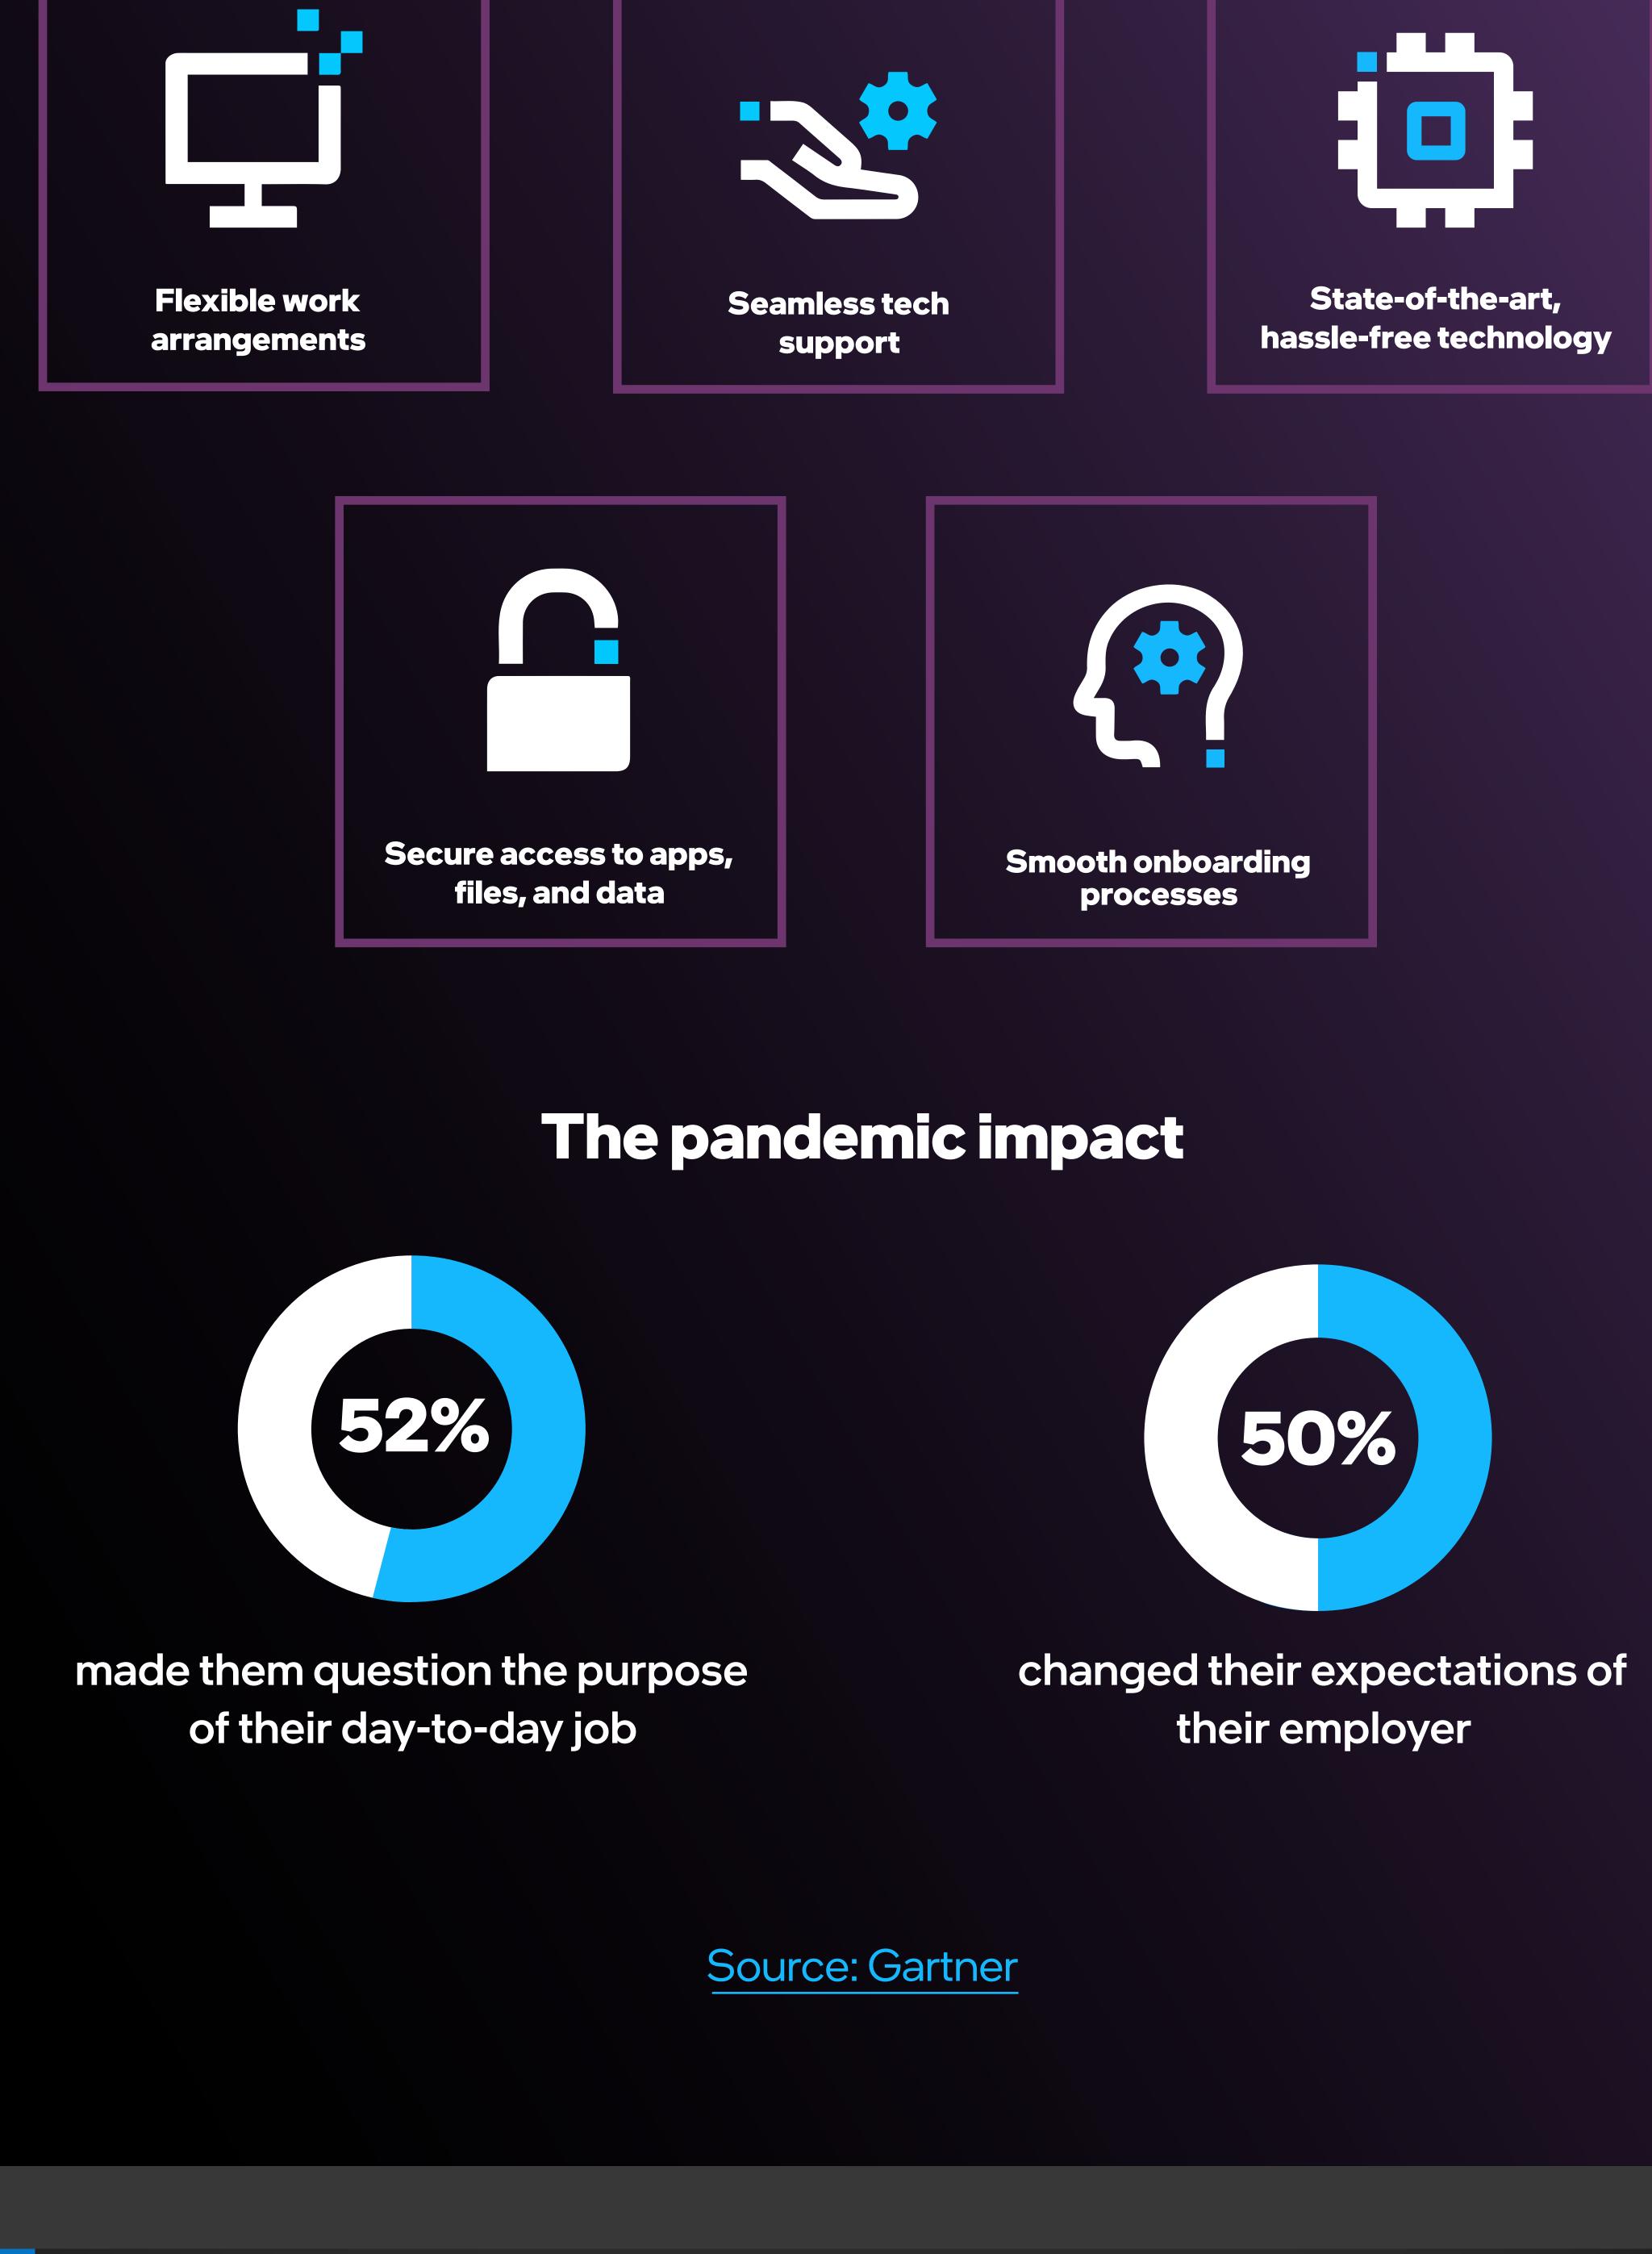

In today's real estate market, sellers have a leg up. Simply put, the number of buyers exceeds the number of available homes.

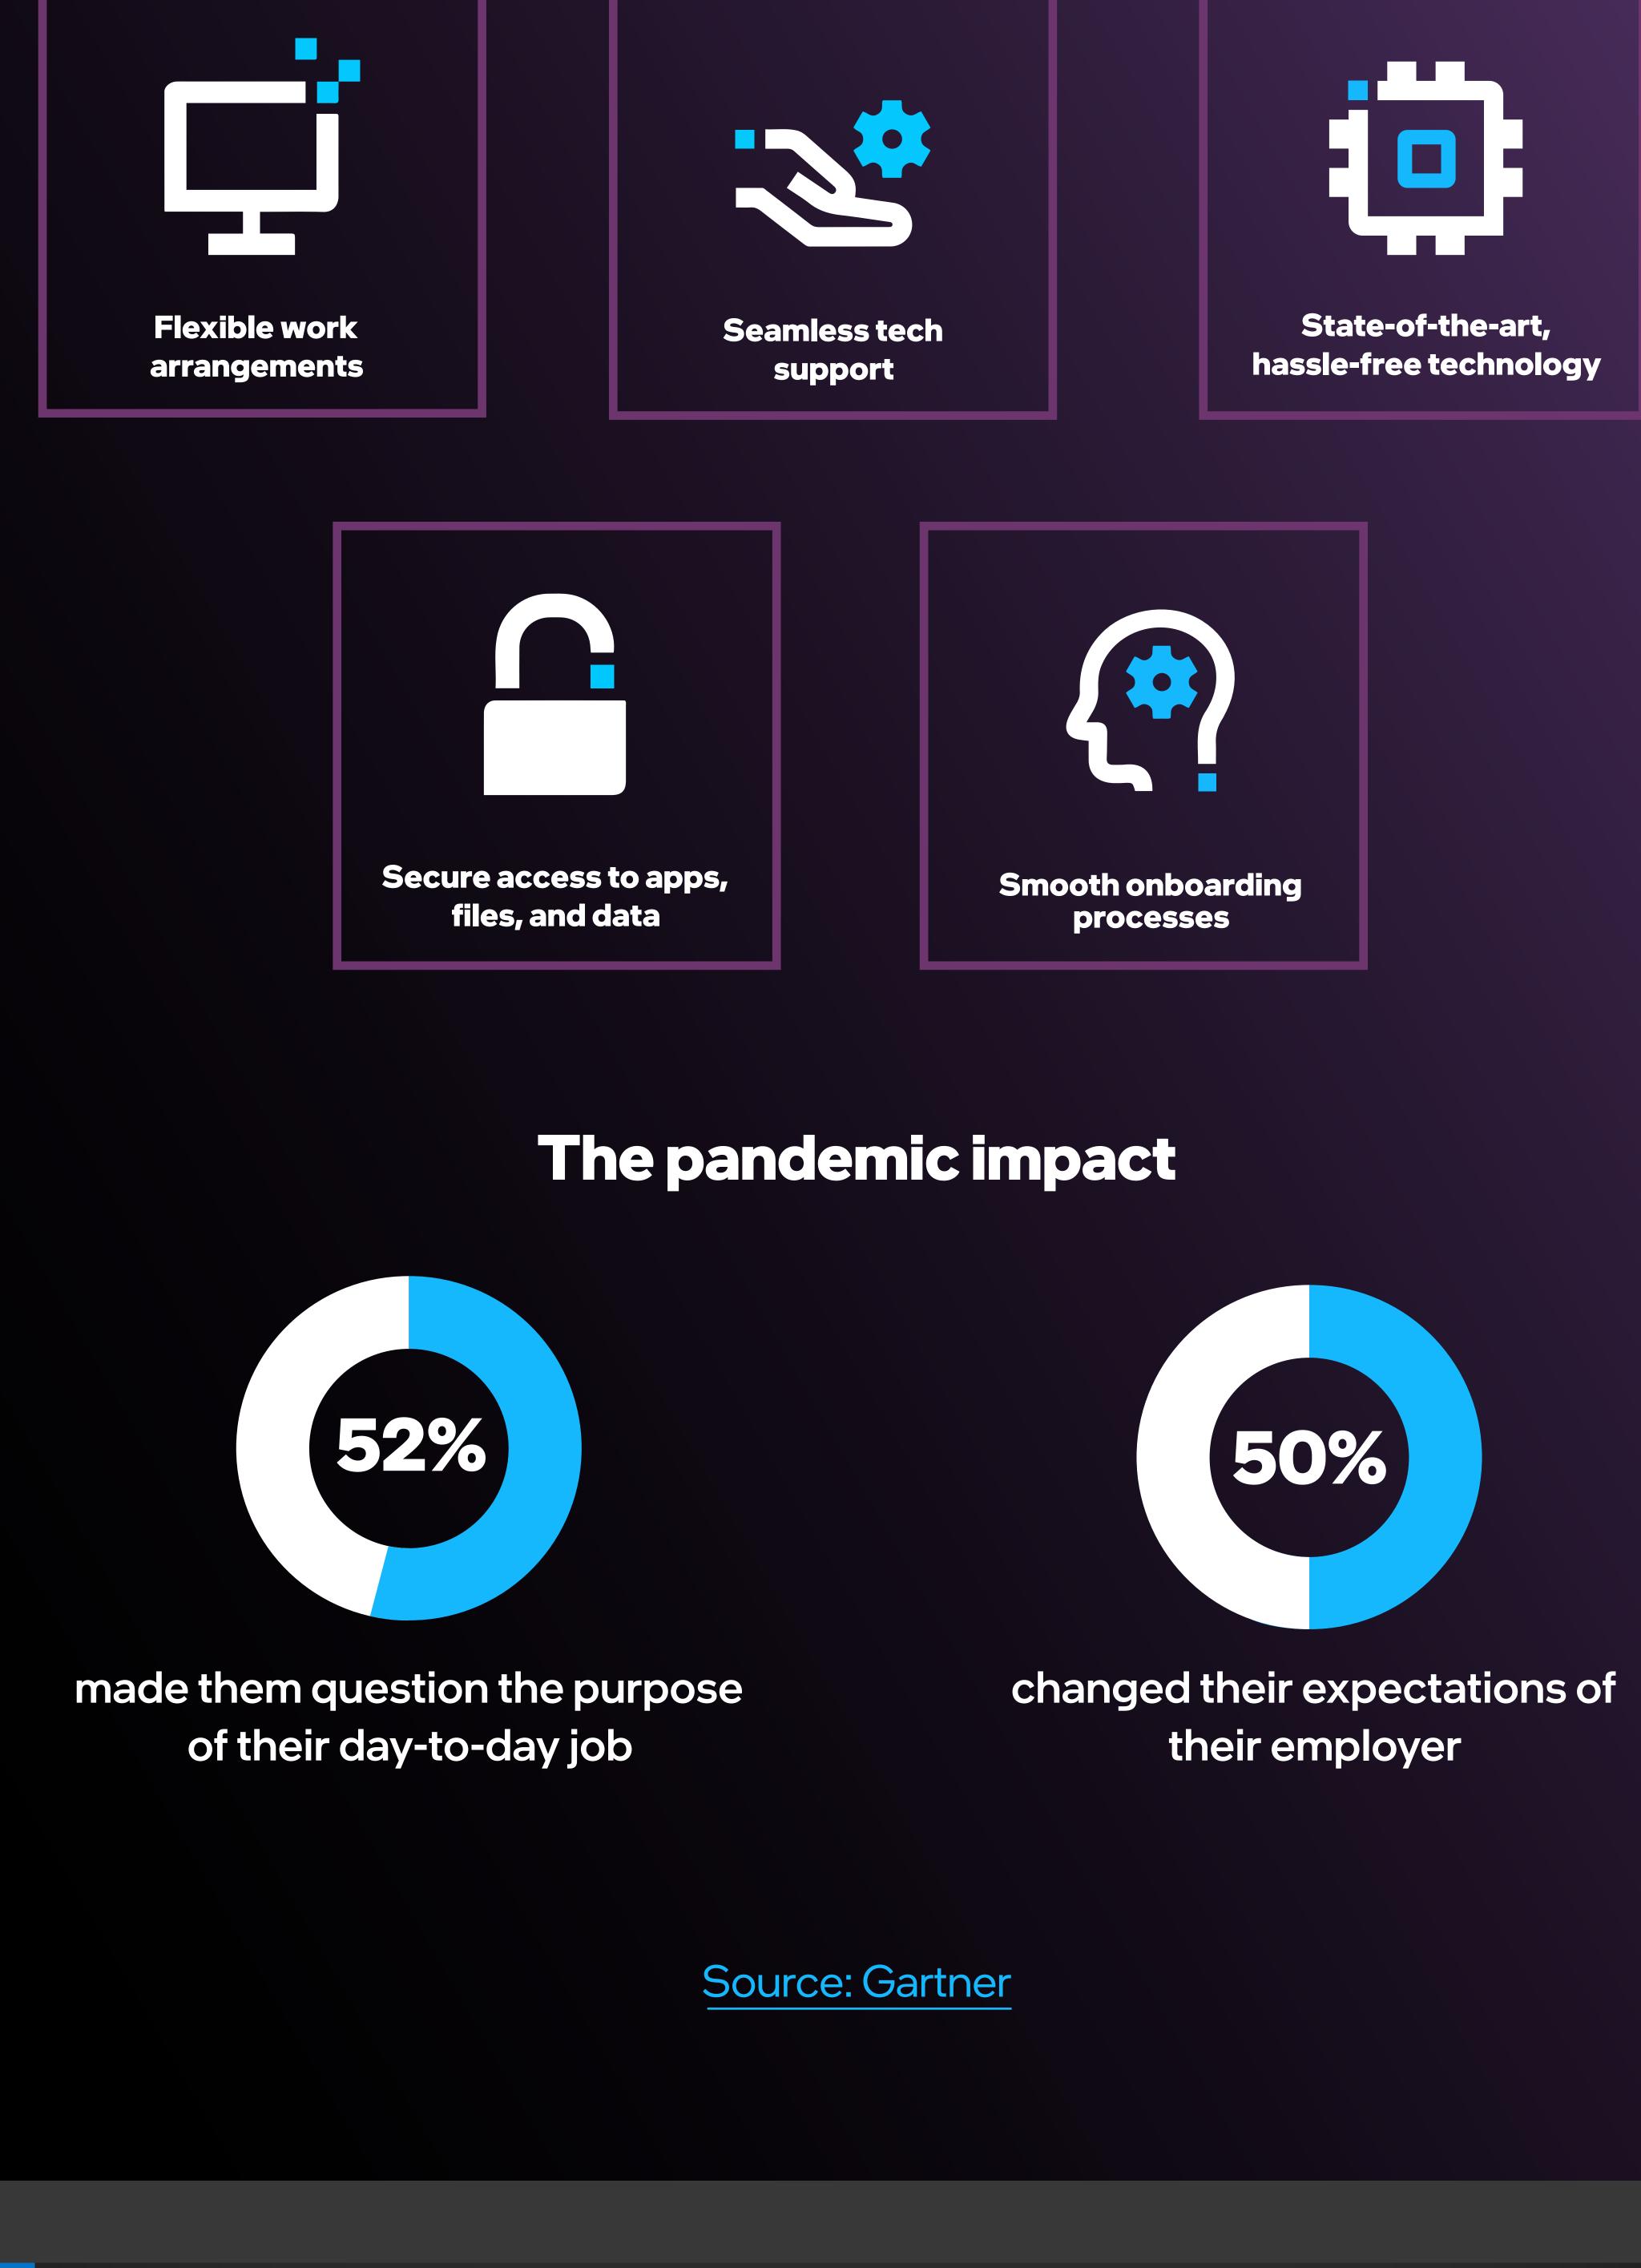

And the same could be said of the modern worker: the number of open jobs exceeds the number of candidates. Clearly employees have a leg up.

In this new norm, it's critical to get the employee experience right.

Employee expectations

What's at stake

There are significant consequences to a poor employee experience.

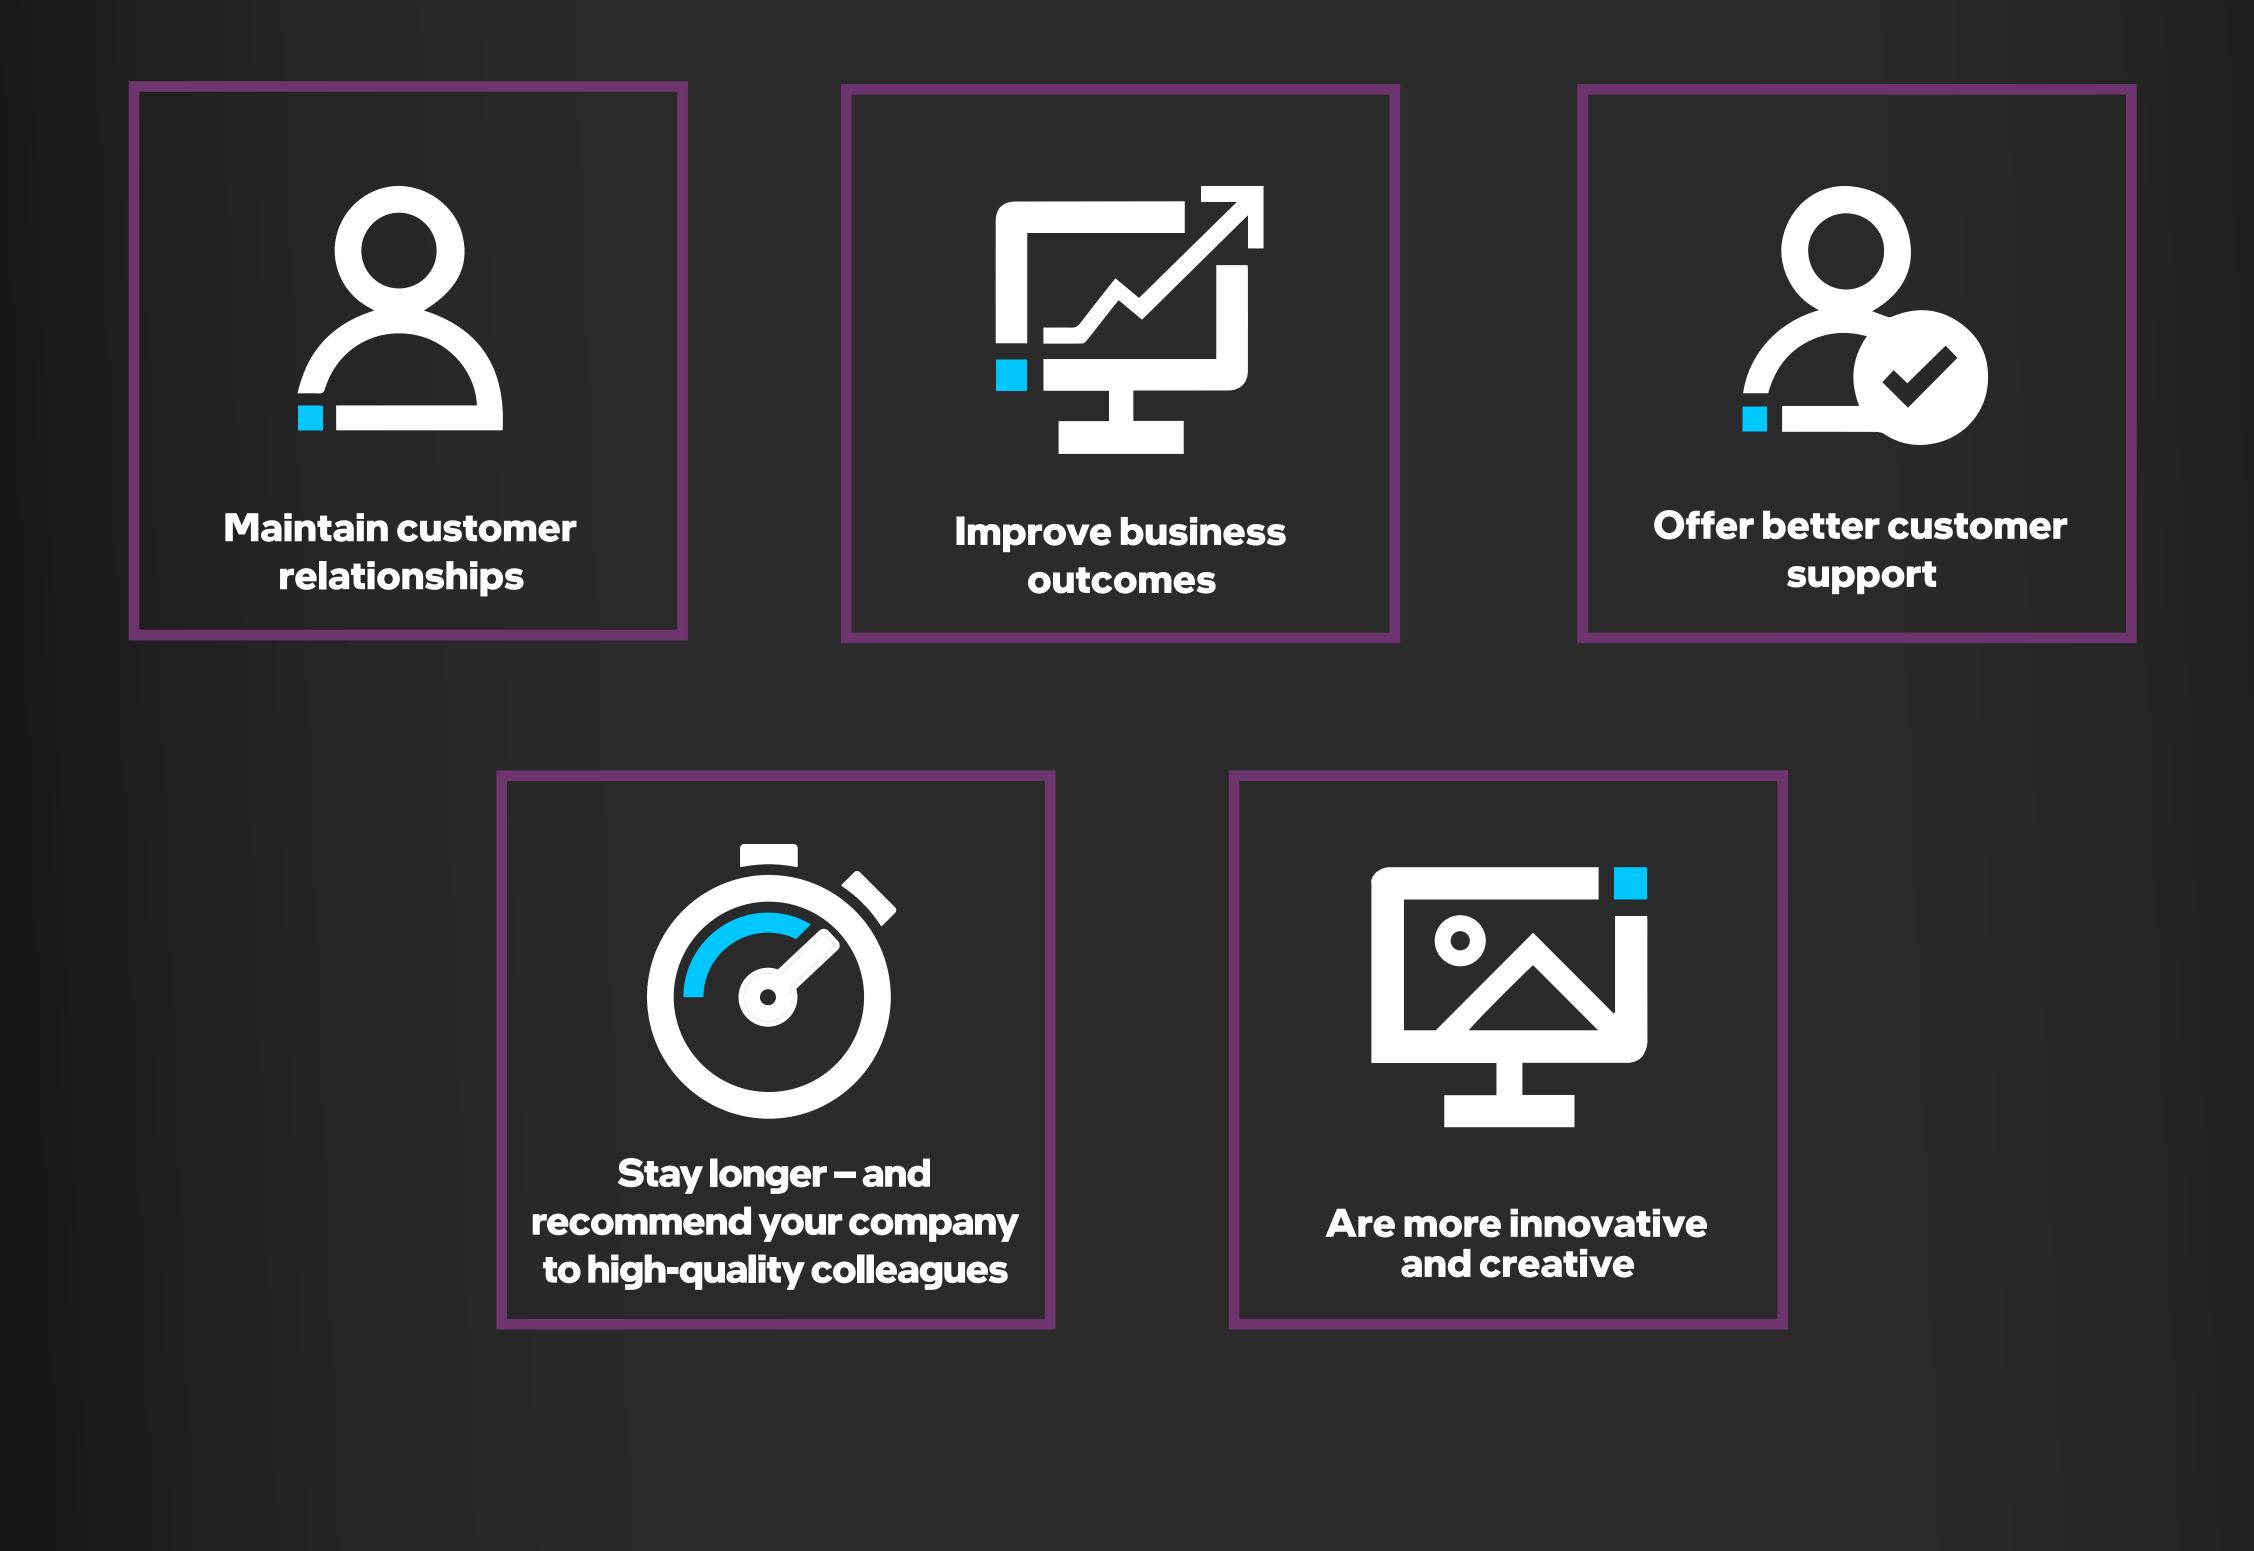

US job openings are at a historic high

In November 2022, there were 10.4 million jobs available, but just 6 million people looking for a job.

Source: Bureau of Labor Statistics

On the flip side, there is real upside and bottom-line impact to having engaged, productive, and happy employees.

Happy & productive employees

Workplace bliss leads to a 12% **increase** in productivity, while distress leads to a 10% decrease.

Source: Warwick University, UK

"A proactive tech refresh strategy increases the chance of reporting a successful security program by roughly 11% to 15%."

Source: Cisco 2021 **Security Outcomes Study**

Managed services can create a better overall user experience

Compucom's Modern Endpoint Management for the Modern Age with Intel vPro[®]

A concierge-style, device-as-a-service for provisioning, device management, and operational support.

- Seamlessly manage devices' complete life cycle
- Remotely monitor, repair, and upgrade all devices
- Allow secure access to files and apps from anywhere
- Ensure security regardless of multiple work locations
- Distribute pre-equipped devices containing applications and tools to new employees
- Reduce maintenance costs
- Reduce downtime and improve IT staff
